## Package Content

Base unit

Metal strip

USB Cable

SR41/ LR41 Batteries

Digital Pen

Stylus

## How to Use

### 1. Insert Pen Batteries

- Remove the battery compartment cover.
- Insert two SR41/ LR 41 batteries; with the positive poles facing up as shown (Use the enclosed SR41/ LR41 batteries).
- Close the battery compartment cover.

**⚠ WARNING:** Do not attempt to open the pen. That may cause the pen to malfunction.

## 2. Insert Stylus

To insert the stylus,

- (1) Slide the stylus into the lower edge of the pen.
- (2) Gently press the stylus until it is locked securely in place.

## 3. Attach the Base Unit to the Computer Monitor

- a. Connect the base unit in to the computer through the USB cable.

- b. Paste the metal strip to left edge of the computer

- c. Attach the base unit along with magnet on to the metal strip.

Note: Some notebooks have HALL-effect switch at the edge of the display, and it may cause the notebook to sleep with black screen when the magnetic metal gets close to it. Before attaching the base unit and metal strip onto the edge, please find an appropriate position to avoid interference of the HALL-effect switch.

## 4. Calibrate

In order to make accurate touch, it is recommended to calibrate the screen with the pen.

Note:

- If you re-calibrate the screen later, click "Reset" in step 5 to clear the previous calibration data before you click "Calibrate".
- Don't move the device after calibration, otherwise you must recalibrate.
